

# Editorial Index

## Subject

### ABDOMINAL IMAGING

- Renal image agent gets go ahead from federal agencies, August p. 7.  
*Trauma: CT in the emergency room*, August p. 37.  
*Developing a new hepatobiliary imaging agent*, June p. 34.  
*Digital subtraction angiography: The community hospital experience*, March p. 26.  
Midwinter meeting examines abdominal and interventional procedures, March p. 40.

### BONE IMAGING

- Imaging technique allows diagnosis of skeletal flaws, November p. 6  
X-ray instrument developed to study density of bone, July p. 15.

### BRAIN IMAGING

- The surgeon's eye into the brain: Intraoperative neurosonography*, September p. 26.  
*Trauma: CT in the emergency room*, August p. 34.

### BREAST IMAGING

- Siemens to offer new configuration for breast imaging, November p. 18.  
Study substantiates mammography use in cancer detection, October p. 12.  
*Diagnostic utility of breast imaging techniques*, September p. 32.  
Do-it-yourself kit: can it really detect mammary tumors?, August p. 7.  
*Progress in receptor radiopharmaceuticals*, June p. 26.  
*Lower screening age urged for breast cancer detection*, May p. 36.  
The sensitive issue of breast cancer screening, April p. 2.  
*Transillumination light scanning*, April p. 28.  
Ultrasound, CT and coronal pulse echo aid breast diagnosis, January p. 6.

### CARDIAC IMAGING

- Gated cardiac imaging: Automated blood pool studies*, December p. 24.  
Gold holds promise for cardiac testing in nuclear medicine, November p. 7.  
Off-line computer set up for analysis of echocardiology, November p. 18.  
Will radiology make comeback in cardiology?, October p. 12.  
Computer-assisted echocardiography aids CAD detection, September p. 6.  
ECT and new imaging agents highlight nuclear medicine meeting, August p. 41.  
Picker digital chest imaging unit in clinical trials, July p. 20.  
Digital intravenous angiograms useful for cardiac imaging, June p. 6.  
Doppler ultrasound finds applications for studying coronaries, June p. 11.  
Same day discharge in heart cath cases proving successful, February p. 5.  
*Recent advances in 2-D echocardiography*, January p. 18.

### CAROTID IMAGING

- Digital subtraction angiography: the community hospital experience, March p. 25.  
*Noninvasive tests for carotid disease*, February p. 24.

### COMPUTED TOMOGRAPHY

- New York hospital opens new medical imaging facility, December p. 21.  
*Theoretical possibilities for CT scanner development*, December p. 32.  
AMA endorses action to lift CT restrictions, November p. 6.  
*CT of the colon*, November p. 66.  
Diagnostic utility of breast imaging techniques, September p. 34.  
Opinion split over diagnostic utility of single-photon ECT, September p. 6.  
*Trauma: CT in the emergency room*, August p. 34.  
Are better diagnostic instruments cost-effective?, July p. 21.  
Clinical validity of digital, NMR described at ARRS, July p. 42.  
HHS calls for abolition of scanner regulations, July p. 18.  
Scanner guidelines finally set for repeal by federal agency, July p. 7.

The following is a complete list of all feature articles (in italics), news and business articles, and columns published in 1982 issues of *Diagnostic Imaging*. Articles are listed by subject (cross-referenced as needed) and by author. Columns are listed in the subject index under individual column headings (i.e. "Convention Coverage," "Computers in Medicine").

- Severe reactions seen in children sedated for CT, July p. 7.  
GE forms business with Japanese firm for CT, new systems, June p. 17.  
Business leaders hear predictions on imaging's future, May p. 46.  
Change in standard for CT utilization due soon from feds, May p. 6.  
Second generation CT reconstructed to sell for \$150,000, April p. 14.  
Charged particle tomography unit patented by Pfizer, March p. 8.  
Midwinter meeting examines abdominal and interventional procedures, March p. 40.  
Planning agencies forced to rescind standards for CT, March p. 8.  
Advances in NMR, CT and ultrasound reported at RSNA annual meeting, February p. 34.  
Another word on CT scanning, February p. 2.  
CT is not used "inappropriately," BRH study finds, February p. 5.  
CT scanning alive and well, January p. 14.  
Two start-ups to develop CT, digital radiography, January p. 11.  
Ultrasound, CT and coronal pulse echo aid breast diagnosis, January p. 6.

### COMPUTERS IN MEDICINE

- Do-it-yourself programming versus custom services, December p. 46

- Hospital information systems face integration hang-ups, November p. 99.  
Teaching your computer how to read and write, October p. 52.  
Micros, minis and mainframes—diverse ways to manage information, September p. 46.  
Input/output devices—how computers understand English, August p. 50.  
Storage media: the computer's pen, paper and filing system, July p. 54.  
Bits, bytes and CPU: a discussion of the computer itself, June p. 46.  
From looms to large scale integrated circuits, May p. 50.

### CONVENTION COVERAGE

- Ultrasound responds to technological refinements, November p. 86.  
NMR shakes 'workshop' reputation with first society meeting, October p. 48.  
Radiologists endorse NMR at diagnostic imaging meeting, October p. 50.  
Radiology administrators hear plea for more collaborative management, September p. 42.  
ECT and new imaging agents highlight nuclear medicine meeting, August p. 40.  
Clinical validity of digital, NMR described at ARRS, July p. 40.  
Business leaders hear predictions on imaging's future, May p. 46.  
Lower screening age urged for breast cancer detection, May p. 36.  
Midwinter meeting examines abdominal and interventional procedures, March p. 40.  
Advances in NMR, CT and ultrasound reported at RSNA annual meeting, February p. 34.  
RSNA annual meeting highlights digital, interventional radiography, January p. 32.

### COST CONTAINMENT

- Massachusetts law would set rates for hospital costs, October p. 8.  
Radiology administrators hear plea for more collaborative management, September p. 42.  
Radiology's share of health care costs placed at about 3%, September p. 10.  
Screening protocol receives criticism from physicians, September p. 7.  
*Are better diagnostic instruments cost effective?*, July p. 21.  
Waving goodbye to Certificate of Need, June p. 2.  
Federal government initiatives toward radiology, May p. 2.  
New technologies could contribute to rising medical costs, May p. 7.  
Diagnostic protocol for extremity x-rays could reduce costs, April p. 7.  
Radiographic repeats: a cost perspective, April p. 12.

### DIGITAL RADIOGRAPHY

- Digital market sizzles with 24% quarterly growth, December p. 23.  
*Digital subtraction angiography, the shape of things to come*, November p. 36.  
Physicians predict changes coming in digital radiography, November p. 11.  
*Vascular DSA proves worth in outpatient set-*

ting, November p. 56.  
 Diasonics acquires, signs OEM deal with small firms, September p. 19.  
 Researchers say arteriography is 'ripe for digital,' October p. 8.  
 The digital angiography market takes shape, September p. 17.  
 Clinical validity of digital, NMR described at ARRS, July p. 40.  
*Digital image processing*, July p. 26.  
 Picker's digital chest imaging unit in clinical trials, July p. 20.  
 Digital intravenous angiograms useful for cardiac imaging, June p. 6.  
 The CRT in medical imaging systems, May p. 31.  
*Searching for gold*, May p. 25.  
 Digital radiography: a perspective on its evolution, May p. 18.  
*Displaying images in three dimensions*, April p. 38.  
 Personal computers can handle digital image manipulation, April p. 7.  
 The commercial systems for digital radiography, March p. 16.  
*Digital subtraction angiography: the community hospital experience*, March p. 23.  
*Noninvasive tests for carotid disease*, February p. 29.  
 RSNA annual meeting highlights digital, interventional radiology, January p. 32.  
 Two start-ups to develop CT, digital radiography, January p. 11.

#### EMISSION TOMOGRAPHY

PETT has potential to indicate areas of mental activity, October p. 7.  
 Opinion split over diagnostic utility of single-photon ECT, September p. 6.  
*Diagnostic utility of breast imaging techniques*, September p. 34.  
 ECT and new imaging agents highlight nuclear medicine meeting, August p. 40.  
 Business leaders hear predictions on imaging's future, May p. 47.  
 Single photon ECT shows promise for studying blood flow, January p. 7.

#### FEDERAL AFFAIRS

Cost of compliance a major problem for many device firms, December p. 21.  
 FDA gets pressure to implement reporting law, November p. 7.  
 RF imaging devices given exemption to FCC regulations, November p. 7.  
 New director sees no rift between BRH, radiologists, October p. 8.  
 Renal image agent gets go ahead from federal agencies, August p. 7.  
 Scanner guidelines finally set for repeal by federal agency, July p. 7.  
 BRH assumes more responsibility for radiologic devices, June p. 8.  
 NRC could allow more leeway in use of imaging agents, June p. 6.  
 Change in standards of CT utilization due soon from feds, May p. 6.  
 Federal government initiatives toward radiology, May p. 2.  
 Nuclear agent for gallbladder studies approved by FDA, May p. 6.  
 FDA categorizes radiologic systems for safe-

ty standards, March p. 13.  
 NMR guidelines for clinical trials established by BRH, May p. 6.  
 NRC proposes to increase training for nuclear physicians, March p. 8.  
 CT is not used "inappropriately," BRH finds, February p. 5.

#### FILM

Speed, data density favor silver halide as imaging medium, August p. 14.  
 Pako Corp. sells its film processor line to a New York firm, May p. 15.

#### LEGAL ISSUES

*The radiologist as expert witness*, November p. 57.  
 Radiologists appeal New Jersey ruling on chiropractors, May p. 6.

#### MANAGEMENT

*Radiographic quality control crucial to diagnostic yield*, December p. 36.  
*Measuring productivity in the radiology department*, November p. 75.  
 PAC-MAN invades realm of medical imaging, November p. 24.  
*Staffing firms offer management advantages*, October p. 37.  
 Radiology administrators hear plea for more collaborative management, September p. 42.  
*The value of meaningful quality assurance*, August p. 28.  
 The AHRA's ten historic years: a decade of progress, August p. 2.  
*RTs: The newest endangered species?*, August p. 20.  
*Technologist staff size: achieving the best level*, August p. 24.  
 The value of meaningful quality assurance, August p. 28.  
 Business leaders hear predictions on imaging's future, May p. 46.  
 Changes in imaging archiving and management, April p. 18.  
*Managing a radiology department in the 80s*, March p. 32.  
*Who will miss you when you're gone?*, January p. 37.

#### MARKETING

Digital market sizzles with 24% quarterly growth, December p. 23.  
 Diagnostic imaging market: the shopping spree continues, November p. 19.  
 Ultrasound technology enters addition/replacement phase of life cycle, October p. 22.  
 The digital angiography market takes shape, September p. 17.  
 The decline of the nuclear medicine equipment market, June p. 20.  
 Ultrasound B-scanners downward trend continues, June p. 21.  
 Diasonics and ADAC forecast markets at tech conference, June p. 17.  
 X-ray equipment growth largest of all medical technologies, June p. 14.  
 Digital radiography: a perspective on its evolution, May p. 18.  
 CT scanning redux, April p. 15.

Changes in image archiving and management, April p. 18.  
 The commercial systems for digital radiography, March p. 16.  
 The market outlook for nuclear magnetic resonance, February p. 11.  
 CT scanning: alive and well, January p. 14.

#### MICROWAVE IMAGING

*Microwaves offer promise as imaging modality*, November p. 44.

#### MONOCLONAL ANTIBODIES

*Monoclonal antibodies in the detection of cancer*, April p. 23.  
 White cell scanning could have benefits over gallium exams, January p. 6.

#### NUCLEAR MAGNETIC RESONANCE

Fonar makes deal for distribution of mobile scanners, November p. 18.  
 NMR researchers studying drugs' toxic effects, November p. 6.  
*Reading the NMR image: as the signal changes, so do image features*, November p. 28.  
 NMR shakes 'workshop' reputation with first society meeting, October p. 48.  
 Radiologists endorse NMR at diagnostic imaging meeting, October p. 50.  
 Untested NMR unit to make use of permanent magnet, October p. 19.  
 Joint venture to make magnets for NMR systems, September p. 10.  
 Asahi Chemical first in Japan to market NMR, September p. 10.  
 Diagnostic utility of breast imaging techniques, September p. 35.  
 Commercial launch of NMR systems to come this fall, August p. 14.  
 ECT and new imaging modalities highlight nuclear medicine meeting, August p. 40.  
 Clinical validity of digital, NMR described at ARRS, July p. 42.  
 NRC could allow more leeway in use of imaging agents, June p. 6.  
 Topical NMR shows value for studying muscular metabolism, June p. 8.  
 Will short-lived radionuclides come of age?, June p. 2.  
 Bell Labs patents NMR method that shows phosphorus, May p. 15.  
 Business leaders hear predictions on imaging's future, May p. 46.  
 NMR guidelines for clinical trials established by BRH, May p. 6.  
 New NMR concern to build units based on Aberdeen setting, April p. 14.  
 Advances in NMR, CT and ultrasound reported at RSNA annual meeting, February p. 34.  
 The market outlook for nuclear magnetic resonance, February p. 11.  
*Magnets: the heart of NMR imaging systems*, February p. 17.

#### NUCLEAR MEDICINE

Diagnostic imaging stands to gain from biotechnology, December p. 21.  
*Gated cardiac imaging: Automated blood pool studies*, December p. 24.  
 Gold holds promise for cardiac testing in nu-

clear medicine, November p. 7.  
Renal image agent gets go ahead from federal agencies, August p. 7.  
The decline of the nuclear medicine equipment market, June p. 20.  
*Developing a new hepatobiliary imaging agent*, June p. 34.  
NRC could allow more leeway in use of imaging agents, June p. 6.  
*Progress in receptor pharmaceuticals*, June p. 22.  
Will short-lived radionuclides come of age?, June p. 2.  
Nuclear agent for gallbladder studies approved by FDA, May p. 6.  
NRC proposes to increase training for nuclear physicians, March p. 8.  
Noninvasive tests for carotid disease, February p. 28.

#### PERSONAL FINANCE

Oil income programs combine current cash flows, inflation hedge, November p. 96.  
Look at tax savings rates before making IRA plunge, October p. 54.  
Pension tax breaks face cuts if Rangel legislation passes, September p. 50.  
How a tax shelter offers inflation protection, August p. 49.  
Mixing tax-saving investments broadens portfolio, builds income, August p. 48.  
Investing in IRAs, Keogh plans, and stock options, July p. 52.  
How discount brokers cut commission costs, June p. 44.  
Making 22% tax free with municipal bonds, May p. 55.  
Planning investments in light of the new tax act, March p. 38.  
Planning loan requests to ease the high cost of borrowing, February p. 42.  
When to take short term capital gains, January p. 40.

#### RADIATION

ACR recommends end to routine chest x-ray tests, November p. 11.  
Deaths attributable to A-bomb radiation may be too low, August p. 7.  
Leukemia does not arise from medical x-ray, study finds, June p. 6.

#### RADIOLOGY ISSUES

Diagnostic imaging stands to gain from biotechnology, December p. 21.  
*The feminine hands takes a firmer grip*, November p. 80.  
Reflections on turning three, November p. 2.  
More radiologists setting up shop in small cities, October p. 8.  
In search of women role models, September p. 2.  
Screening protocol receives criticism from physicians, September p. 7.  
Electronics form buys manufacturer of small x-ray units, August p. 18.  
Are better diagnostic instruments cost-effective?, July p. 21.  
Doppler ultrasound finds applications for studying coronaries, June p. 11.  
Federal governments initiatives toward radiology, May p. 2.

Diagnostic protocol for extremity x-rays could reduce costs, April p. 7.  
Evaluating the necessity of diagnostic tests, March p. 2.  
Facing up to overutilization, January p. 2.

#### RADIOPHARMACEUTICALS

Concern raised over future supply of stable isotopes, November p. 11.  
Gold holds promise for cardiac testing in nuclear medicine, November p. 7.  
ECT and new imaging agents highlight nuclear medicine meeting, August p. 41.  
Renal image agent gets go ahead from federal agencies, August p. 7.  
*Developing a new hepatobiliary imaging agent*, June p. 34.  
NRC could allow more leeway in use of imaging agents, June p. 6.  
*Progress in receptor radiopharmaceuticals*, June p. 23.  
Will short-lived radionuclides come of age?, June p. 2.  
Nuclear agent for gallbladder studies approved by FDA, May p. 6.

#### SPINAL IMAGING

*Trauma: CT in the emergency room*, August p. 36.  
Advances in CT, ultrasound reported at RSNA annual meeting, February p. 36.

#### TECHNOLOGISTS

*RTs: The newest endangered species?*, August p. 20.  
*Technologist staff size: achieving the best level*, August p. 24.  
Training guidelines for tech licensing being developed, March p. 9.  
*Associated Sciences workshop explores tech training*, January p. 34.

#### TECHNOLOGY ASSESSMENT

Learning to agree on diagnostic standards, December p. 2.  
AMA panel to take in-depth look at new technologies, August p. 7.  
Are better diagnostic instruments cost-effective?, July p. 21.  
*The CRT in medical imaging systems*, May p. 31.

#### ULTRASOUND

Four new firms poised to enter ultrasound market, December p. 21.  
New York hospital opens new medical imaging facility, December p. 21.  
Ovulation can be detected sonically, Mayo group reports, November p. 6.  
Pittsburgh firm sues Elscint for \$5 million, November p. 18.  
*Questions chase answers about ultrasound's safety*, November p. 62.  
Ultrasound responds to technological refinements, November p. 86.  
Ultrasound's role grows in monitoring fetal development, November p. 11.  
Digitized RF pulse said to improve ultrasound quality, October p. 19.  
Doppler ultrasound traces blood flow to detect blood disease, October p. 7.  
*Getting more from ultrasound: tissue charac-*

*terization*, October p. 26.  
*Perinatal care advances to point 'where the fetus is truly our patient'*, October p. 33.  
Turf battles in ultrasound, October p. 2.  
*Ultrasound physicians exercise clinical creativity*, October p. 32.  
Ultrasound technology enters addition/replacement phase of life cycle, October p. 22.  
*Diagnostic utility of breast imaging techniques*, September p. 33.  
Invasive ultrasound heads program at Brighton, September p. 6.  
*Making the most of the ultrasound armament*, September p. 22.  
*The surgeon's eye into the brain: Intraoperative neurosonography*, September p. 26.  
Audio/visual group to buy vascular ultrasound concern, August p. 18.  
Clinical validity of NMR discussed at ARRS, July p. 43.  
Doppler ultrasound finds application for studying coronaries, June p. 11.  
Symposium will not assess ultrasound's safety in fetal tests, June p. 11.  
Ultrasound useful for intraoperative Ob/Gyn procedures, June p. 8.  
Squibb and ADR could merge, both sign letter of intent, May p. 15.  
Technicare acquires Echo Laboratories, a transducer maker, April p. 14.  
Midwinter meeting examines abdominal and interventional procedures, March p. 40.  
Advances in NMR, CT and ultrasound reported at RSNA annual meeting, February p. 37.  
*Noninvasive tests for carotid disease*, February p. 24.  
Ultrasound system built for detecting embolism in lungs, February p. 5.  
*Recent advances in 2D echocardiography*, January p. 22.  
Ultrasound, CT and coronal pulse echo aid breast diagnosis, January p. 6.

#### WASHINGTON REPORT

Cost containment regulation would cut earnings of radiologists, December p. 17.  
Federal rules would broaden clinical definition of 'physician,' November p. 14.  
Health care providers to bear scars from Medicare budget cuts, October p. 16.  
Report throws new fuel on Medicare budget debate, September p. 8.  
Reagan pushes for changes in hospital-based physician payment, August p. 11.  
HHS calls for abolition of scanner regulations, July p. 18.  
X-ray equipment largest of all medical technologies, June p. 14.  
Federal health planning could make a comeback, May p. 13.  
Reagan proposes a cut in radiologists' reimbursement, April p. 10.  
Legislators appraise Reagan's Medicaid swap plan, March p. 12.  
Government attempts to 'get at the root' of health costs, February p. 8.  
New reimbursement policies expected in 1982, January p. 8.
